Envision Michigan

The things I love about Michigan are all just very simple things to enjoy doing with family and friends. One thing I love is snowmobiling that is something I enjoy very much with my brother and best friend. Another thing is going mud bogging in my truck and videotaping it to show to people later on. I love the outdoors too the hunting and fishing because there is plenty of land and water to do both on as much as you like. So to sum it all up if you like the outdoors with a little adventure then you will love Michigan.

I think that some of my best visions for the state are the universities we have here in Michigan. We have a lot of educational places to turn to after doing our 4 years in high school so we don't have to look very hard for the one that we want to attend most. Also we have a lot of frats that we can join in these universities that will help us along the way to make brighter more educated citizens for the future.

The thing that I would love to change about our state the most is the economy. That is the one thing that would make our state a lot better and would bring more people to live here or at least come for visits. I think it is wrong for there to be so many people in this state but not enough jobs to bring the welfare percentage up. If anything they need to take some of the middle aged people out of minimum wage jobs so that new citizens can make something for themselves. We have all these middle aged people working in spots where there could be new life trying to grow why wouldn't we want to change it.

Also another problem that I would like to see addressed in the near future is the college tuition costs. If we have no jobs for college kids to get then how are they supposed to pay for themselves to get an education? I believe that one thing or the other needs to happen either

the job situation should change so we can pay for college or tuition needs to lower itself to its more affordable for teens. Welfare is another problem that could be addressed because the rate of people living off of welfare and the government is outrageous. If anything we should we should take away some of the advantages that people have so it's not so easy to live off the government? Maybe that would motivate some citizens to get out there and look for a new better life without having them live off the government's money and taxes.

There is only one more problem that I believe to be addressed right now and that is the drugs in these small towns and nothing being done about them. I think that if we cleaned up some of the drugs that would help with a lot of the problems because right now people keep getting pregnant and thinking they can just sell drugs and take of a family. Well if we took out all of most of them we wouldn't have to worry about so many welfare people or unemployed people selling and receiving drugs. That is my essay on how I love Michigan and how we can clean my fair state up and make it better for everyone.
